REPORT OF HEALTH OFFICER

AUGUST 30, 1927.

To the COMMISSIONERS:

I herewith respectfully submit a report of the work done by the health department during the fiscal year ending June 30, 1927.

PART I

POPULATION

The population of the District of Columbia is now well over the half million mark. According to the estimate of the United States Bureau of the Census, the total population of this District is given as 528,000, of which 394,300 are white and 133,700 colored. It is on this estimated population that all statistical data contained in this report are based.

GENERAL BIRTH RATES AND DEATH RATES

Data regarding population, births, stillbirths, and deaths recorded during the calendar year 1926, with similar data for previous years, will be found in the following table:

Population, births, stillbirths, and deaths in the District of Columbia, with corresponding rates during the calendar years 1901-1926, inclusive

Calendar year	Popula- tion	Births	Still- births	Deaths	Rate per 1,000		
					Births	Still- births	Deaths
1901-1905 ¹	311,325	5,409	570	6,042	17.38	1.83	19.41
1906-1910 ¹	336,940	6,900	577	6,304	20.48	1.71	18.71
1911-1915 ¹	353,443	7,028	478	6,188	19.88	1.35	17.50

MORBIDITY AND MORTALITY STATISTICS

General mortality.—The total number of deaths occurring during the calendar year 1926 was 7,388, an increase of 372 over the year preceding. On the other hand, the number of births during the same period decreased from 9,173 in the previous year to 9,004 in the year just closed.

The general death rate declined slightly during the calendar year 1926. The rate for the year 1925 was 14.09 for 1,000 of population, while in the year just ended it was 13.99.

Of the 7,388 deaths occurring during the year 1926, 4,598 were white and 2,790 colored. These figures give a white death rate of 11.66 and a colored of 20.87. A comparison of these rates with those of the previous year shows the white death rate increased from 11.37 to 11.66 per 1,000 of population, while the colored declined from 22.68 in the year 1925 to 20.87 in the year just ended.

In considering the most potent cause of death it is found that diseases of the heart rank first, with a total of 1,142 deaths, pneumonia was responsible for 807, nephritis 733, pulmonary tuberculosis 532, and apoplexy 516.

INFANT MORTALITY

It is very gratifying to note that the death rate in infants under 1 year of age declined from 87.3 for each 1,000 of births reported in the year 1925 to 84.5 during the year just ended, the white rate being 66.7 and the colored 123. The decline in the rate was principally among the colored population.

Racial population, deaths, and death rates in the District of Columbia, by calendar years, from 1901 to 1926, inclusive

Years	Population		Deaths		Death rates

COMMUNICABLE DISEASES OF ANIMALS

Rabies.—The presence of rabies in the District of Columbia continued throughout the year. The number of animals found to be suffering from that disease increased from 67 in the year 1925 to 117 during the last year. The number of persons reported to have been bitten by dogs were 123 as against 71 during the preceding year. It seems to me that the situation calls for some drastic measure to protect the public from these attacks by vicious or unmuzzled dogs.

The law authorizes the poundmaster to capture dogs found running at large without a license tag and during a certain portion of the year the poundmaster is also authorized to impound dogs running at large without a muzzle. A large number of these animals are impounded and destroyed, but with only one vehicle engaged in the work, it is not possible to cover the District as efficiently as it should be.

PART II

ADMINISTRATION

BUREAU OF PREVENTABLE DISEASES

During the calendar year 1926 chicken pox, diphtheria, measles, whooping cough, and pneumonia prevailed to a greater extent than during the preceding year. An epidemic of measles resulted in a total of 6,757 cases of that disease being reported with 34 deaths. Pneumonia alone caused the death of 807 persons.

The amount and character of the work done in the contagious disease service during the fiscal year 1927 is shown in the following table.

Reportable diseases in the District of Columbia—Cases reported during the fiscal year 1926-27

Diseases	Fiscal year		Diseases	Fiscal year	
	1926	1927		1926	1927
Anterior poliomyelitis.....	21	6	Smallpox.....	14	45
Chicken pox.....	1,000	1,644	Tuberculosis.....	1,157	1,339
Diphtheria.....	807	1,036	Typhoid fever.....	81	86
Epidemic cerebrospinal meningitis.....	4	4	Whooping cough.....	1,084	641
Leprosy.....	0	0	Influenza.....	176	152
Measles.....	6,764	264	Total.....	12,098	6,020
Pellagra.....	7	12			
Scarlet fever.....	983	791			

Ambulance service.—This service removed during the year to the isolation buildings for minor contagious diseases, a total of 637 patients.

Isolating wards, Garfield Memorial and Providence Hospitals, service and expenses during the fiscal year 1927

Institution	Pay patient days	Free patient days	Total patient days	Total appropriated by the Government	Paid by the District for year	Cost to District per free patient per day	Amount received from pay patients
Garfield Memorial Hospital.....	2,811	3,566	6,377	\$15,000.00	\$13,436.10	\$3.77	\$8,720.59
Providence Hospital.....	928	2,643	3,571	8,000.00	8,000.00	3.06	(1)

¹ No account of money received from pay patients was rendered by Providence Hospital.

The urgent need for a suitable building under Government control for the treatment of persons suffering from minor contagious diseases has been pointed out in several preceding reports.

The new motor ambulance provided for in the appropriation act of 1927 was placed in operation. The use of this vehicle has enabled the health department to remove patients to the smallpox hospital with much more comfort and expedition than formerly.

MEDICAL AND DENTAL INSPECTION OF PUBLIC SCHOOLS

The medical and dental inspection in the public schools of this District is one of the most important branches of the health-department work. The personnel engaged in the work however is very inadequate. A much larger corps of medical and dental inspectors and school nurses is badly needed in order to give the children in the schools of this district the care that they are entitled to. More dental clinics are also urgently needed.

The District of Columbia is far behind many of the other large cities in its school medical and dental work, and it is hoped that something may be done to secure a more adequate force to properly carry on the work. The present force consists of 1 chief medical inspector, 12 medical and 4 dental inspectors, and 8 dental operators, all of which are only part-time employees. In addition, there are 10 school nurses and 4 dental hygienists.

The total number of physical examinations made by the medical inspectors during the school year were 41,776. During the year it was possible to make a complete physical examination of 3,761 pupils attending the kindergarten and first grades. This, however, is only a small part of the total number attending these grades, and I regret that because of inadequate personnel it was not possible to examine every pupil in the grades mentioned.

Two thousand four hundred and forty-three pupils were excluded from school for various causes during the year.

Three thousand seven hundred and sixty-one kindergarten and first-grade pupils were physically examined during the school year, with the result that 95 per cent were found to have some physical defect. While a number of the defects found were of a more or less minor importance, nevertheless they should be corrected, so that the child might be as free from physical handicaps as possible.

The outstanding defects in this group of children were: Defective teeth, 67.8 per cent; diseased tonsils, 46.7 per cent; enlarged cervical glands, 33.2 per cent; poor nutrition, 24.3 per cent; defective nasal breathing, 21.9 per cent; defective vision, 12.3 per cent; orthopedic defects, 10.9 per cent; anemia, 9.1 per cent; skin and parasitic disease, 6.6 per cent; chronic nasal catarrh, 5.9 per cent; defective speech, 4.8 per cent; pulmonary diseases, 4.6 per cent; nervous system, 4 per cent; and cardiac disease, 2.3 per cent.

One hundred and twenty-four pupils who were retarded in their classes were physically examined during the school term. Of these, 120, or 96.7 per cent, were found to have some physical defect.

Seven hundred and ninety-two pupils were examined for "child labor permits." Of this number, 287 were given permits and 500 were granted temporary permits only, and 5 refused permits.

One thousand and ninety-five applicants for appointment as teachers or for admission to the normal schools were given careful physical examination, and of this number 366, or 33.4 per cent, were passed; 674, or 61.5 per cent, were passed conditionally; 53, or 4.8 per cent, rejected temporarily; and 2 were definitely rejected.

One thousand nine hundred and thirty-nine pupils in 19 different schools were given the "Schick test," and 1,397 of those who were found to be susceptible were immunized against diphtheria by the administration of "toxin-antitoxin."

The dental inspectors examined 20,270 pupils and 1,095 applicants for admission to the normal schools and teaching positions, making a total of 21,365 examinations.

The dental operators treated a total of 4,568 pupils during the school year, necessitating a total of 37,948 operations. In addition, the dental hygienists gave prophylactic treatment to 7,307 pupils.

School nurses handled a total of 15,932 pupils during the year. Of this number 26.9 per cent were cured, 1.9 per cent improved, and 13.8 per cent had treatment instituted.

BUREAU OF SANITARY INSPECTION

General nuisance inspections.—Approximately 91,550 official visits of all kinds were made by the sanitary inspectors during the year. Seventy-one thousand three hundred and ninety-three of these visits were made necessary by complaints of nuisances. The other visits were made in the regular inspection of certain establishments, etc., distributed throughout the city. Violation of laws or regulations for the prevention and abatement of nuisances were reported in 12,122 instances.

It was necessary in 237 instances to refer the matter to the police court in order to secure the abatement of the nuisance. Much of the time of the inspectors is consumed in the court in the prosecution of these cases, 49 working-days being taken up in this work during the last year.

In 37 instances it was found necessary for the District, under authority of existing law, to cause the abatement of nuisances existing on certain property of which the owners were nonresidents of this District. The cost of this work was \$1,828.33, which amount was assessed as a tax against the property concerned.

Mattress law.—On July 3, 1926, "An act to regulate the manufacture, renovation, and sale of mattresses in the District of Columbia" was approved. Pursuant to the authority conferred in section 6 of this act regulations were promulgated by the commissioners for the government of the industry in the District.

Child-hygiene service.—The number of persons availing themselves of the opportunities offered at the various child-hygiene stations has steadily increased. During the fiscal year 1927 two additional stations were established—one at No. 5327 Georgia Avenue NW. and the other at No. 1201 Talbert Street SE. The attendance at these two new stations has been gratifying. The operation of these stations has supplied a need in the sections of this city in which they are located that has long been felt. It is the purpose during the current fiscal year to establish another new station at No. 2012 Rhode Island Avenue NE. The establishment of this station has been made possible by the increased appropriation made available for the child-hygiene service.

During the fiscal year just ended, in addition to the opening of the two new stations, two additional nurses were appointed to do follow-up work in the homes of the children attending the stations.

The need for more home visiting has been recognized for some time past, but it was not possible heretofore to bring that about because of the lack of necessary funds.

The total number of visits made to the various stations during the year was 39,910, of which 27,314 were made by white children and 12,596 by colored.

The nurses made a total of 20,992 visits to the homes of children.

The following table shows in detail the amount of work done at the various child-hygiene stations:

Annual report of the child-hygiene service

Months	Visits						Readmitted cases			Total visits				Total			Nurses visits to homes

TABLE 1A.—Showing deaths and death rates in the District of Columbia during the calendar year 1926, arranged with reference to race and sex, and classified with reference to causes of death—Continued

Classification No.	Cause of death	Total deaths			General death rates			Per cent- age of each cause to total mor- tality	Deaths by race and sex				Total by sex			
		White	Colored	All	White	Colored	All		White		Colored		Male	Female		
									Male	Female	Male	Female				
III. Diseases of the nervous system and of the organs of special sense—Continued																
71	Meningitis:															
71a	1. Cerebral.....	1	1	1	.003	.007	.002	.014	1	1	1	1	1	1	1	1
	2. Pachymeningitis.....	10	2	12	.025	.015	.002	.023	4	6	1	1	5	7	1	1
	3. Pneumococic.....	1	1	2	.003	.003	.002	.014	1	1	1	1	2	1	1	1
	4. Purulent.....	8	8	16	.020	.006	.015	.008	7	1	1	1	7	3	1	1
	5. Simple.....	3	3	6	.008	.006	.006	.041	3	3	1	1	3	7	1	1
	6. Septic.....	3	3	6	.008	.006	.006	.027	2	2	2	2	2	2	2	2
	7. Staphylococcus.....	2	2	4	.005	.015	.008	.054	2	2	3	3	3	2	2	2
	8. Streptococic.....	2	3	5	.005	.022	.006	.041	1	1	5	1	6	3	1	1
	9. Nonepidemic.....	1	6	7	.003	.045	.013	.085	1	1	1	1	2	1	1	1
71b	Tabs dorsalis.....	1	1	2	.003	.007	.004	.027	1	1	1	1	2	2	2	2
72	Other diseases of the spinal cord:															
73	1. Bulbar paralysis.....	1	1	2	.003	.007	.004	.027	1	1	1	1	2	2	2	2
73a	2. Chronic poliomyelitis.....	1	1	2	.003	.007	.004	.027	1	1	1	1	2	1	1	1
	3. Chronic spinal muscular atrophy.....	1	1	2	.003	.007	.004	.027	1	1	1	1	2	1	1	1
	4. Progressive muscular atrophy.....	1	1	2	.003	.007	.004	.027	1	1	1	1	2	1	1	1
	5. Spastic paraplegia.....	4	3	7	.003	.022	.004	.095	2	2	3	3	5	2	2	2
	6. Transverse myelitis.....	2	2	4	.005	.004	.004	.027	1	1	1	1	2	1	1	1
	7. Spinal paralysis.....	1	1	2	.003	.007	.004	.027	1	1	1	1	2	1	1	1
	8. Spinal sclerosis.....	357	159	516	.905	1.189	.977	6.984	172	185	62	97	234	282	282	282
74a	Cerebral hemorrhage, apoplexy.....	7	4	11	.018	.030	.021	.149	2	5	4	4	5	6	6	6
74b	Cerebral embolism.....	15	8	23	.038	.060	.044	.311	5	10	4	4	9	14	14	14
75	Cerebral thrombosis.....	4	10	14	.010	.075	.027	.189	1	3	3	7	4	10	10	10
75a	Paralysis without specified cause.....	2	1	3	.005	.007	.006	.041	1	1	1	1	1	2	2	2
75b	General paralysis.....	17	29	46	.043	.217	.087	.623	15	2	23	6	38	8	8	8
76	General paralysis of the insane:															
	1. Dementia paralytica.....	8	9	17	.020	.067	.033	.240	6	2	6	3	12	5	5	5
	2. General paresis.....	2	2	4	.005	.004	.004	.027	2	2	1	1	3	3	3	3
	3. Progressive paresis.....	4	2	6	.010	.015	.012	.081	4	1	2	2	6	1	1	1
77	Other forms of mental alienation:															
	1. Dementia praecox.....	1	1	2	.003	.003	.002	.014	1	1	3	3	4	1	1	1
	2. Lactentia insanity.....	4	6	10	.010	.045	.019	.135	3	1	1	1	6	4	4	4
78	Epilepsy.....	1	1	2	.003	.003	.002	.014	1	1	1	1	2	1	1	1
79	Convulsions epileptiform.....	1	1	2	.003	.003	.002	.014	1	1	1	1	2	1	1	1

80	Eclampsia nonpuerperal.....	1	3	1	.007	.002	.014			1	2	1	2
82	Infantile convulsions (under 5 years of age).....	1	4	.003	.022	.008	.054			1	1	1	2
83	Multiple neuritis.....	1	2	.003	.007	.004	.027	1		1	1	1	1
84	Softening of the brain.....	1	1	.003		.002	.014			1			
84a	Other diseases of the brain.....												
	Cystic degeneration of the nervous system:												
	Dissminated spinal sclerosis.....	1	1	.003		.002	.014	1			1	1	1
	Hemorrhagic encephalitis.....	1	1	.003		.002	.014	1			1	2	2

XIV. External causes															
Suicide:															
165	Lycol poisoning.....	1	—	1	.003	—	.002	.014	—	1	—	—	—	—	1
	Veronal poisoning.....	2	—	2	.005	—	.004	.027	—	2	—	—	—	2	2
	Bichloride of mercury poisoning.....	5	—	5	.013	—	.009	.068	1	4	—	—	1	4	4
166	Carbolic acid poisoning.....	—	1	1	—	.007	.002	.014	—	—	—	1	—	1	1
	Cyanide of potassium poisoning.....	—	—	3	.008	—	.006	.041	1	2	—	—	1	2	2
	Phenol poisoning.....	1	—	1	.003	—	.002	.014	1	—	—	—	1	1	1
167	Chloroform poisoning.....	1	—	1	.003	—	.002	.014	1	—	—	—	1	1	1
	Inhalation of illuminating gas.....	21	2	23	.053	.015	.044	.311	12	9	1	1	13	10	10
	Hanging by neck.....	5	1	6	.013	.007	.012	.081	4	1	1	—	5	5	5
168															

169	Drowning	3	1	3	.008	.009	.041	2	1	2	1
170	Incised wound of throat, with razor blade	31	1	31	.008	.003	.416	29	1	29	4
171	Jumping from Washington Monument	1	1	1	.003	.007	.002	1	1	2	1
172	Jumping from other high places	4	1	4	.003	.007	.004	3	1	3	1
175	Piomaine poisoning	4	1	5	.010	.007	.008	4	1	5	1
177	Other acute accidental poisonings (gas excepted):				.010		.068				
	Accidental poisoning—										
	Banana oil	1	1	1		.007	.014		1	1	2
	Bichloride of mercury	1	1	2	.003	.007	.004		1	1	1
	Chloral (overdose)	1	1	1	.003	.007	.002	1		1	1
	Ergot (overdose)	1	1	1	.003		.002		1		1
	Iodine	1	1	1		.007	.002		1		1
	Lysol	1	1	1	.003		.002		1		1
	Morphine	1	1	1	.003		.002		1		1
	Injection of oil of wintergreen, mistaken for castor oil	1	1	1	.003		.002		1		1
179	Accidental burns of body	23	14	37	.008	.104	.071	10	13	15	22
180	Accidental asphyxia	1	1	1		.007	.002		1	1	1
	Accidental asphyxia, face on pillow	2	1	3	.005	.007	.006	1	1	1	2
	Accidental asphyxia, fall in tub of boiling water	1	1	1	.003		.002		1	1	1
	Accidental cave-in of dirt bank	2	2	2		.015	.004		2	2	1
	Accidental suffocation, epilepsy convulsions	1	1	1	.003		.002		1		1
181	Accidental absorption of irrespirable, irritating, or poisonous gas:										
	Carbon monoxide poisoning	2	2	2		.015	.004		2	2	2
	Ether anaesthesia	2	2	2		.015	.004		1	1	1
	Ethylene and oxygen narcosis	2	2	2			.027		1	1	1
	Inhalation of illuminating gas	22	12	34	.005	.060	.004	13	9	21	13
	Nitrous oxide gas anaesthesia	1	1	1	.056	.007	.460	8	4	1	1
	Accidental:						.002				
182	Drowning	11	7	18	.028	.052	.034	10	1	17	1
183	Wound by firearms	2	1	3	.005	.007	.041	2	1	3	1
185	Traumatism by fall						.006				
	Fall from building	2	6	8	.005	.045	.015	2	6	8	1
	Fall from chair	2	2	2	.005		.027	1	1	1	1
	Fall from electric light pole	1	1	1	.003		.002		1	1	1
	Fall from ladder	2	2	2	.005		.004	1	1	1	1
	Fall from ladder (with 100 pounds ice)	1	1	1		.007	.002		1	1	1
	Fall from porch	2	2	2	.005		.004	1	1	1	1
	Fall from tree	1	1	1	.003		.002		1	1	1
	Fall from scaffold	2	1	3	.005	.007	.041	2	1	3	1
	Fall from step	1	1	1	.003		.002		1	1	1
	Fall from window	2	2	2	.005		.004		1	1	1
	Fall in room	1	1	1	.003		.002		1	1	1
	Fall in ice plant, where employed	1	1	1	.003		.002		1	1	1
	Fall in yard	1	1	1	.003		.002		1	1	1
	Fall in railroad yard	2	2	2	.005		.004		2	2	2
	Fall downstairs	1	1	1	.003		.002		1	1	1
	Fall down stairs	7	5	12	.018	.037	.023	2	5	4	8
	Fall down elevator shaft	2	2	4	.005	.015	.008	2	2	4	4
	Fall on ice	2	2	2	.005		.027	2	2	2	2
	Fall to floor	22	2	21	.003		.040	19	1	2	19
	Fall to street	2	2	2	.005		.004	1	1	1	1
	Fall, fracture of femur	1	1	1	.003		.002		1	1	1

VIII. Sensitivity, old age

XIII. Scilly, old age	
Total, senility (old age)	
XIV. External causes	
Suicide:	
165	Lysol poisoning.....
166	Veronal poisoning.....
	Bichloride of mercury poisoning.....
	Carbolic acid poisoning.....
	Cyanide of potassium poisoning.....
	Phenol.....
167	Chloroform.....
	Inhalation of illuminating gas.....
168	Hanging by neck.....
169	Drowning.....
170	Firearms.....
171	Incised wound of throat, with razor blade.....
172	Jumping from Washington Monument.....
173	Jumping from other high places.....
174	Potomaine poisoning.....
175	Other acute accidental poisonings (gas excepted)
176	Acetate:
	Poisoning, banana oil.....
	Poisoning, bichloride of mercury.....
	Poisoning, chloral (overdose).....
	Poisoning, ergot (overdose).....
	Poisoning, iodine.....
	Poisoning, lysol.....
	Poisoning, morphine.....
	Poisoning, injection of oil of wintergreen, mis-
	taken for castor oil.....
179	Burns of body.....
180	Asphyxia.....
	Asphyxia, face on pillow.....
	Asphyxia, fall in tub of boiling water.....
	Cave in of dirt bank.....
	Suffocation, epilepsy, convulsions.....
181	Carbon monoxide poisoning.....
	Ether anesthesia.....
	Ethylene and oxygen narcosis.....
	Inhalation of illuminating gas.....
	Nitrous oxide gas anesthesia.....
182	Drowning.....
183	Wound by firearms.....
184	Traumatism by fall.....
185	Fall from building.....
	Fall from chair.....
	Fall from electric-light pole.....
	Fall from ladder.....
